Projects

E-Commerce Website (tools used Html CSS) 🔗

It's an E-Commerce webpage implemented by using Html, CSS, Java script.

E-Learning Website (tools used Html CSS JavaScript) 🔗

Here I developed an interactive E-Learning web application using Html CSS Java script.

- Using Html I create the structure of a web page and I Use semantic HTML5 elements to define different parts of a website and Using Different type of tags.
- Using CSS to style your HTML elements and layout. I applying the stylings of a website. Implement responsive design with media queries to ensure your website looks good on all devices.
- Using Java Script is used for scripting the webpage for behaviour of webpage and JavaScript code to handle events like clicks, form submissions, and page navigation. And add interactivity, such as dynamic content loading, also Used for input validation.
